Von Brian Lockett : Balls Eight: History of the Boeing Nb-52b Stratofortress Mothership before purchasing it in order to gage whether or not it would be worth my time, and all praised Balls Eight: History of the Boeing Nb-52b Stratofortress Mothership:

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Great reference on this subjectVon PipThis is a very nice reference book and highly recomended to all interested in the subject. The Kindle Edition makes this book very affordable and I hope the other volume on this subject "Painting Guide for the Boeing Stratofortress Motherships" from the same author will be made available as Kindle edition too.

KurzbeschreibungIt has been asserted that the Boeing NB-52B Stratofortress, carrying Air Force serial 52-0008, can

lay claim to being the airplane that has seen and participated in more history than any other single airplane. For forty-five years, the NB-52B was a fixture at Edwards Air Force Base. While the NB-52B is most famous for launching the three North American X-15 rocket planes, it continued to serve in the role of launch platform for a multitude of programs until its final mission on November 16, 2004. It was the oldest flying B-52 by nearly ten years. The eBook edition has more pictures than the print edition.
