**Von Giulio Zambon : Beginning JSP, JSF and Tomcat: Java Web Development (Expert's Voice in Java)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Beginning JSP, JSF and Tomcat: Java Web Development (Expert's Voice in Java):

KurzbeschreibungStart building Javabased web applications now, even if youre a complete newcomer to Java. Comprehensive and example-driven, Beginning JSP, JSF, and Tomcat: Java Web Development, Second Edition is all you need to develop dynamic Java-based web applications using JSP, connect to databases with JSF, and put them into

action using the worlds most popular open source Java web server, Apache Tomcat. A comprehensive introduction to JavaServer Pages (JSP), JavaServer Faces (JSF), and the Apache Tomcat web application server Key concepts made easy to grasp by numerous working examples and a walkthrough of the development of a complete e-commerce project Written for professionals by a practicing Java web application professional and expert What youll learn Develop dynamic web applications using the popular JavaServer Pages (JSP) technology Connect to SQLbased databases, like MySQL, from JSP/JSFbased web pages Integrate XML and HTML markup into your Java web page or Java-based web application Build an ecommerce web site using sound design principles Deploy web applications using the worlds most popular and widely adopted open source Java web application server, Apache Tomcat Includes HTML5 coverage Who this book is forThis book is ideal for anyone new to Java who wants to start developing Java web applications, but also offers a valuable refresher to Java web developers who are new to the latest JSP, JSF, and Tomcat standards. Over the years, he learned a dozen computer languages and worked with all sorts of operating systems. His specific interests were in telecom and real-time systems, and he managed several projects to their successful completion. In 2001 Giulio founded his own company offering computer telephony integration (CTI) services, and he used JSP and Tomcat exclusively to develop the web side of the service platform. Back in Australia after many years in Europe, he now dedicates himself to writing software to generate and solve numeric puzzles. His web site, <http://zambon.com.au/>, is written in JSP on his dedicated server, which, unsurprisingly, runs Tomcat!
