Von Flavio E. Goncalves : Building Telephony Systems with OpenSER before purchasing it in order to gage whether or not it would be worth my time, and all praised Building Telephony Systems with OpenSER:

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Too much system administration and installationVon Kees MeijsThe book gives a lot of helpful pointers for beginners into OpenSER. Though, there's too much pages on installing e.d. Debian. Those pages would better be filled with information on OpenSER itself.

KurzbeschreibungThis book is a well illustrated, step-by-step guide to building a SIP based network using OpenSER. This book is for readers who want to understand how to build a SIP provider from scratch using OpenSER. Telephony and Linux experience will be helpful but is not essential. Readers need not have prior knowledge of

OpenSER. Kurzbeschreibung This book is a well illustrated, step-by-step guide to building a SIP based network using OpenSER. This book is for readers who want to understand how to build a SIP provider from scratch using OpenSER. Telephony and Linux experience will be helpful but is not essential. Readers need not have prior knowledge of OpenSER.

ber den Autor und weitere Mitwirkende Flavio E. Goncalves was born in 1966 in Brazil. Having always had a strong interest in computers, he got his first personal computer in 1983 and since then it has been almost an addiction. He received his degree in Engineering in 1989 with a focus on computer-aided design and computer-aided manufacturing. He is also the CEO of V. Office Networks in Brazil-a consulting company dedicated to the areas of Networks, Security, and Telecommunications and a training center since its foundation in 1996. Since 1993, he has participated in a series of certification programs and been certificated as Novell MCNE/MCNI, Microsoft MCSE/MCT, Cisco CCSP/CCNP/CCDP, Asterisk dCAP, and some others. He started writing about open source software because he thinks that the way certification programs were organized in the past was very good for helping learners. Some books today are written by strictly technical people who, sometimes, do not have a clear idea of how people learn. He tried to use his 15 years of experience as an instructor to help people learn about the open source telephony software. His experience with networks, protocol analyzers, and IP telephony combined with his teaching experience give him an edge to write this book. This is the third book written by him; the first one was "Configuration Guide for Asterisk PBX", BookSurge Publishing. As the CEO of V. Office, Flavio E. Goncalves balances his time between family, work, and fun. He is a father of two children and lives in Florianopolis, Brazil, one of the most beautiful places in the world. He dedicates his free time to water sports such as surfing and sailing. You can contact him at flavio@asteriskguide.com, or visit his website www.asteriskguide.com.
