Great reading for aviation enthusiasts and military buffs.Von Midwest Book ReviewMustang Designer: Edgar Schmued And The P-51 is the complete story behind the development and deployment of one of the most famous fighter aircraft of World War II. Beginning with the choosing of fighter designs in the formative years of 1935 to 1939 covering P-30 to P-50 craft, author Ray Wagner presents the birth of the Mustang in 1940 as designed by Ed Schmued and North American Aviation. The various incarnations and variations of the Mustang are followed up to and including the early jet age years of 1945 to 1952 and the Northrop Aviation launch of a new fighter. A highly recommended design and development history, Mustang Designer is enhanced for the aviation enthusiast and military buff with an appendix,

Sehr lohnend Von Martin Grabiger Beschrieben wird eine Erfolgsgeschichte: ein mit deutscher Grndlichkeit versehener und ausgebildeter Ingenieur - Enthusiast geht nach Amerika, bekommt dort seine Chance, und die Briten tun ihr damals bestes Triebwerk dazu. Herausgekommen aus diesem frhen Beispiel (teils unfreiwilliger) internationaler Zusammenarbeit ist das mit Abstand schnste Propellerjagdflugzeug ( in der D - Version) aller Zeiten (sorry, Mr. Reginald Mitchell !), und das wird in diesem Buch hervorragend geschildert. Noch heute sehen Tucano und Pilatus Trainer fast wie Kopien aus, was bestimmt kein Zufall ist. Ein klasse Buch!

Kurzbeschreibung Mustang Designer tells the story of American wartime fighter development, including engines and armaments, as part of a nationwide program of aircraft builders and fliers, focusing on Edgar Schmued, the designer of the Mustang. The P-51 Mustang is widely regarded as the best propeller-driven fighter that ever flew. What many might not realize is that the plane's developer was a German migrant. This book tells of how Schmued created a weapon that would ultimately prove lethal to the aspirations of those who had seized control over his native land. Pressestimmen North Americans P-51 Mustang has consistently been regarded by many as the best propeller-driven fighter ever produced. What few people know, however, is that this exceptional plane, which protected Allied bombers and established dominance in the skies over Europe by defeating Germanys legendary Messerschmitts and Focke-Wulfs, was designed by a self-taught German immigrant. Noted aviation historian Ray Wagner documents the professional life of Edgar Schmued, North Americans star design engineer and Mustang creator. . . Mustang fans will find little to fault in Wagners history. [The book] is a successful blend of engineering documentation and personal history, and aviation readers should thoroughly enjoy [it]. Aviation Heritage The P-51 Mustang is a legend. Many knowledgeable observers consider it to be the premier long-range fighter of World War II, and those who have flown it call the Mustang one of the finest single-seat aircraft ever built. . . Drawing upon a wide variety of neglected sources, including original procurement and flight-test records, and especially Schmued's personal papers, Wagner has crafted a well-written and beautifully illustrated account that chronicles the Mustang's design history in rich and exacting detail. Air Power History This fascinating, well illustrated book . . . brings alive the struggles and triumphs of all [the] competing aircraft factories and their products in the World War II days. . . . The style is straightforward, livened up with reminiscences from many interviews and Schmued's own notes. . . . Ray Wagner has done a remarkable job. WASP News Mustang Designer is a milestone in aviation historical writing because the author [looks] at aircraft design in the context of its history. . . . A must for serious readers.
