Von Giovanni Toraldo : OpenNebula 3 Cloud Computing before purchasing it in order to gage whether or not it would be worth my time, and all praised OpenNebula 3 Cloud Computing:

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. One of the few publications on this topicVon BeetThere are unfortunately not that many publications on Open Nebula which, along with Open Stack, is one of the major platforms for private clouds. Unfortunately the book does not refer to the latest version, hence four stars. I have found it to be nevertheless both readable and usable with newer versions.

KurzbeschreibungThis is a step-by-step practical guide to get you started easily with openNebula. It guides you to build, maintain, and configure your cloud infrastructure, providing real-world examples in a simple and coherent manner. If you are a GNU/Linux system administrator with no experience with virtualization or cloud computing but

eager to learn about it, or you are thwarted by your current virtualized infrastructure, this book is for you. You are expected to have some basic knowledge of GNU/Linux, with knowledge of basic package management tools and system configuration. Kurzbeschreibung This is a step-by-step practical guide to get you started easily with openNebula. It guides you to build, maintain, and configure your cloud infrastructure, providing real-world examples in a simple and coherent manner. If you are a GNU/Linux system administrator with no experience with virtualization or cloud computing but eager to learn about it, or you are thwarted by your current virtualized infrastructure, this book is for you. You are expected to have some basic knowledge of GNU/Linux, with knowledge of basic package management tools and system configuration. ber den Autor und weitere Mitwirkende Giovanni Toraldo started to mess with Linux and Free Software since the early years at school, developing hobbyist websites with free CMS and maintaining the official Italian support site of PHP-Fusion. After a few unsatisfactory years at the university, he decided to start working as System Administrator and Web Developer at LiberSoft (<http://www.libersoft.it>), a startup based in a technology park near Pisa (<http://www.polotecnologico.it/>). He has now developed skills in designing and maintaining Open Source virtualization and clustering solutions, managing tens of host, servicing hundreds of requests, mainly web hosting stacks for Drupal and Symfony webapps.
