Von Alex Nuijten, Iloon Ellen-Wolff, Learco Brizzi : Oracle APEX Best Practices before purchasing it in order to gage whether or not it would be worth my time, and all praised Oracle APEX Best Practices:

KundenrezensionenHilfreichste Kundenrezensionen1 von 1 Kunden fanden die folgende Rezension hilfreich. Es erfüllt, was es versprichtVon CustomerGleich zu beginn mchte ich sagen, dass es kein Einsteigerbuch ist. Man erfahrt zwar, wie man eine APEX-Umgebung aufsetzt, aber es fehlen die Grundlagen. Die sollte man sich aus anderen Bchern, oder aus den verschiedenen Quellen im Internet besorgen.Das Buch hilft als Nachschlagewerk fr immer wieder auftauchende Probleme oder Fragen. Diese beantwortet es aber vollstndig. Man muss das Buch also nicht von vorne bis hinten durchlesen. Auf die einzelnen Kapitel gehe ich hier nicht weiter ein, das ist beim Verlag genau nachzulesen.Weshalb ich nur 4 Sterne gebe? Das Thema Oracle Cloud und Apex wird nur kurz angerissen. Da fehlt mir ein wenig Inhalt. Das kann allerdings daran liegen, dass diese Technik erst seit einigen Tagen/Wochen ffentlich ist und ein solches Buch nicht mal eben vor dem Verffentlichungstermin gendert/erweitert werden kann. Warten wir auf die nchste Auflage, vielleicht steht dann mehr dazu drin.Wer kein Interesse an einer Cloud-Lsung mit APEX und

Oracle sucht, für den ist dieser Sternabzug nicht von Bedeutung. 0 von 0 Kunden fanden die folgende Rezension hilfreich. Wenig an richtige Inhalt Von Allen George Chaplin Leider nicht besonders Hilfreich. Es besteht aus nur ein paar Tips. Das hätte man in viel weniger Seiten schreiben können.

Kurzbeschreibung
In Detail
Have you ever wanted to create real-world database applications? In this book you're not only getting APEX best practices, but will also take into account the total environment of an APEX application and benefit from it. "Oracle APEX Best Practices" will guide you through the development of real-world applications. It will give you a broader view of APEX. The various aspects include setting up APEX environment, testing and debugging, security, and getting the best out of SQL and PL/SQL. In six distinct chapters you will learn about different features of Oracle APEX as well as SQL and PL/SQL. Do you maximize the capabilities of Oracle APEX? Do you use all the power that SQL and PL/SQL have to offer? Do you want to learn how to build a secure, fully functional application? Then this is the book you'll need. "Oracle APEX: Best Practices" is where practical development begins!
Approach
In clearly written chapters you will be guided through different aspects of Oracle Application Express. Varying from setting up your environment to maximizing SQL and PL/SQL. Examples are given based on a simple but appealing case. Who this book is for
This book is filled with best practices on how to make the most of Oracle APEX. Developers beginning with application development as well as those who are experienced will benefit from this book. You will need to have basic knowledge of SQL and PL/SQL to follow the examples in this book.

ber den Autor und weitere Mitwirkende
Alex Nuijten
Alex Nuijten works as a database developer and Expertise Lead (database development) for AMIS Services BV in Nieuwegein, the Netherlands. Besides his consultancy work, he also conducts training classes, mainly in SQL and PL/SQL. Alex has been a speaker at numerous international conferences, such as ODTUG, Oracle Open World, UKOUG, and OBUG. He is also a frequent contributor at the Oracle Technology Network forum for SQL and PL/SQL. He has written many articles in Dutch Oracle related magazines, and at regular intervals he writes about Oracle database development on the AMIS Technology Blog, as well as his own blog Notes on Oracle. In August 2010, Alex was rewarded with the Oracle ACE Director membership.
Iloon Ellen Wolf
Iloon Ellen Wolf started working with Oracle twenty one years ago, employed by several software houses in the Netherlands. Her experience goes back to Oracle Forms version 2 and Report*writer. Almost fourteen years ago, she started working for Oracle Support Services for the developer competency (Oracle Forms, Oracle Reports, Sql Developer and Application Express) assisting customers with solving their software problems. During those years, she applied the knowledge she gained in other ways like coaching new engineers, team leading and teaching Application Express courses for Oracle University. One of her responsibilities in Oracle Support is Global Technical Lead Application Express. She works closely with Sustaining Engineering, Product Development, and Product Management from the Application Express team. Besides that, she is a frequent speaker for different Oracle User Groups about Application Express and Sql Developer.
Learco Brizzi
After Learco received his MSc in Informatics in 1993, he started working with the early versions of Oracle Forms (3.0), Reports (1.1) and Designer (1.2.1). When WebDB was launched, Learco made the first steps on building internet applications. When APEX (HTMLDB) hit the market, he saw the potential of this tool and built a complete music download store with it in 2004, including integration with email, reports and payment service providers. This was one of the very first serious applications ever built with APEX. Nowadays, Learco is dedicated to APEX and PL/SQL development. He is a very enthusiastic technician, trainer of advanced APEX courses, presenter at conferences, organizer of seminars, committee member of the OGh (Oracle user group in the Netherlands) and member of the editorial committee for Oracle magazine 'OGh Visie'. Together with a companion Learco started his own company, Itium, in 1999, which specializes in Oracle technology.
