Von Lucas Jellema : Oracle SOA Suite 11g Handbook (Oracle Press) before purchasing it in order to gage whether or not it would be worth my time, and all praised Oracle SOA Suite 11g Handbook (Oracle Press):

KundenrezensionenHilfreichste Kundenrezensionen1 von 1 Kunden fanden die folgende Rezension hilfreich. Excellent Use-Cases for SOA in context of Oracle ProductsVon Nikki JukkaOracle SOA Suite 11g Handbook is thick pile of paper with well thought and organized content. This book isn't full blown "explain it all" with 100 pages of installation instructions (they are as extras in internet) and way too much pictures (they are also in internet), but it's more of excellently distilled and well balanced textbook which has good mixture of theory and practical product specific tips. I haven't read from internet extras, which expand cover of book and give step by step details for examples, but even without those this book just shines and shows such commitment that it's rare. I recommend this book for all that are preparing to Oracle SOA certification and I can 100% guarantee that it helps - I've done it with this book, you can do it also.. No other references are needed.1 von 1 Kunden fanden die folgende Rezension hilfreich. Good bookVon TartarinWell written, a bit lengthy though. I like the idea of having extra content to download for free.

Definitely a good book to get started with!

Kurzbeschreibung Master Oracle SOA Suite 11g Design and implement an agile service-oriented enterprise computing infrastructure using the detailed information in this Oracle Press guide. Written by an Oracle ACE director, Oracle SOA Suite 11g Handbook uses a hands-on case study to illustrate each programming, management, and governance concept. Get expert techniques for modeling and implementing complex business processes and deploying and securing Web services, while maximizing decoupling and code reuse. Install Oracle SOA Suite 11g or migrate from a previous version Design and develop composite applications using SCA and SDO Model processes using BPEL, BPMN, and human task components Connect components through mapping and filtering with Oracle Mediator Apply the principles of event-driven architecture through complex event processing, the event delivery network, and Oracle Business Activity Monitoring server Benefit from the power of Java through the Spring component and the interaction with Oracle Validate, enrich, transform, route, and operate on data using the Oracle Service Bus Deploy, test, and manage composite applications from the Oracle Enterprise Manager control console Kurzbeschreibung Master Oracle SOA Suite 11g Design and implement an agile service-oriented enterprise computing infrastructure using the detailed information in this Oracle Press guide.
