Hochspannung pur !Von OberleserateAufmerksam geworden auf den Autor bin ich durch sein erstes Buch Tower of Secrets, welches unter den Autobiographien im Geheimdienstbereich schon herausragt. Hier hat er es jetzt geschafft, seine enorme Klugheit und seine Lebenserfahrung mit seiner Zeit beim KGB, der Kooperation mit CIA und NSA und der profunden Kenntnis des Investmentbankings (sein neuer Beruf nach dem bertritt in den Westen) zu einem

faszinierenden Roman zusammenzuführen. Die Hauptfigur Cyrus Grant ist auf der Suche nach den vielen Milliarden Dollar, die (natürlich fiktiv) in der ra Gorbatschow ausser Landes geschafft wurden, um den zerfallenden Kommunismus doch noch zu retten. Wenn man nicht genau wusste, dass alles angelehnt ist an eigene Erfahrungen, könnte man es für absurd halten. Und genau das ist die Stärke dieses Buches. Hoffentlich kommt bald eine Fortsetzung.

Kurzbeschreibung Party Gold A Cyrus Grant novel of Suspense A small ultra-secret organization working directly for the President springs into action upon information that Russian Communist Party, about to lose power, has placed hidden billions strategically around the world. Can investment banker Cyrus Grant track the money and prevent a geopolitical catastrophe for the US? Also by Victor Sheymov: TOWER OF SECRETS A Real Life Spy Thriller Superlative a breathtaking true story a towering book, fascinating and hair-raising far more exciting than the most exciting accomplished fiction of the spy genre. -- Associated Press CYBERSPACE AND SECURITY A Fundamentally New Approach This book clarifies shows how the security methods we have designed for the physical world are futile in cyberspace. If we want effective cybersecurity we need to understand the real and different nature of cyberspace, and the decision makers and security professionals have to understand the laws and rules of cyberspace and why and how they work in cybersecurity. Victor Sheymov is a computer security expert, author, scientist, inventor, and holder of multiple patents for methods and systems in cyber security. He was responsible for coordination of all security aspects of Russian cipher communications with its outposts abroad when he was exfiltrated with his wife and daughter by the CIA in 1980. He worked for the National Security Agency for a number of years and is a recipient of several prestigious awards in intelligence and security. Victor Sheymov also authored articles in The Washington Post, Barron's, World Monitor, National and other national publications. He appeared at many national news programs including Larry King Live, 48 Hours, Dateline, McNeil-Lehrer, Charlie Rose and the McLaughlin Report.

He was responsible for coordination of all security aspects of Russian cipher communications with its outposts abroad when he was exfiltrated with his wife and daughter by the CIA in 1980. He worked for the National Security Agency for a number of years and is a recipient of several prestigious awards in intelligence and security. Victor Sheymov is also the author of TOWER OF SECRETS: A Real Life Spy Thriller. This memoir describes how Sheymov, ace troubleshooter for the KGB super-secret Eighth Chief Directorate, operating out of the infamous Lubyanka Moscow Center, was head of security for cipher communications worldwide, and thus had a rare knowledge of the entire KGB system. A star player, headed for the top, his contacts ranged from party elite to the dissident community and the Moscow underworld. Victor Sheymov is also the author of CYBERSPACE and SECURITY: A Fundamentally New Approach. This book establishes that our legacy computer security systems are failing for a simple reason: we tried to adopt security methods developed in our physical space for protecting cyberspace objects. These two spaces are so different that methods effective in one do not necessarily work in the other. Our physical space security methods are generally static. In order to adapt to the highly dynamic environment of cyberspace, we need to base our security on dynamics and secure virtualization. Victor Sheymov also authored articles in The Washington Post, Barron's, World Monitor, National and other national publications. He appeared at many national news programs including Larry King Live, 48 Hours, Dateline, McNeil-Lehrer, Charlie Rose and the McLaughlin Report.
