KundenrezensionenHilfreichste Kundenrezensionen2 von 2 Kunden fanden die folgende Rezension hilfreich. I couldn't put it down!Von xScott-Donelan is not Tom Brown, no tracking ants here. He is also not Jack Kerney. Brown gets down in the dirt and tells you the nitty-gritty of pressure releases. Kerney shows you how to sign cut and use a stick to measure stride and locate the next track. Scott-Donelan tells you what tracking is like when the quarry may hide his tracks or circle around and shoot. His accounts of bush warfare are worth the price of admission. (Scott-Donelan's book also turned me on to Jim Hooper's Beneath the Visiting Moon, a first hand account of tracking in a brush war, also fine read.) Tactical Tracking Operations is your book if you are interested in tracking or just want to read a tale of

adventure. I give it five stars, there is nothing else like it.
