KundenrezensionenHilfreichste Kundenrezensionen0 von 2 Kunden fanden die folgende Rezension hilfreich. A mustVon Bjoern Hoej JakobsenThis book is the best!!The structure and content gives a very good picture of

Django.Examples are very nice done!The section about Templates is super!.

**Kurzbeschreibung**This latest edition of The Definitive Guide to Django is updated for Django 1.1, and, with the forwardcompatibility guarantee that Django now provides, should serve as the ultimate tutorial and reference for this popular framework for years to come. Django, the Pythonbased equivalent to Rubys Rails web development framework, is one of the hottest topics in web development today. Lead developer Jacob KaplanMoss and Django creator Adrian Holovaty show you how they use this framework to create awardwinning web sites by guiding you through the creation of a web application reminiscent of ChicagoCrime.org.The Definitive Guide to Django is broken into three parts, with the first introducing Django fundamentals such as installation and configuration, and creating the components that together power a Djangodriven web site. The second part delves into the more sophisticated features of Django, including outputting nonHTML content such as RSS feeds and PDFs, caching, and user management. The appendixes serve as a detailed reference to Djangos many configuration options and commands. What youll learn The first half of this book explains in depth how to build web applications using Django including the basics of dynamic web pages, the Django templating system interacting with databases, and web forms. The second half of this book discusses higher-level concepts such as caching, security, and how to deploy Django. The appendixes form a reference for the commands and configurations available in Django. Who this book is forAnyone who wants to use the powerful Django framework to build dynamic web sites quickly and easily.

**ber den Autor und weitere Mitwirkende**Adrian Holovaty, a web developer/journalist, is one of the creators and core developers of Django. He works at washingtonpost.com, where he builds database web applications and does "journalism as computer programming". Previously, he was lead developer for World Online in Lawrence, Kansas, where Django was created. When not working on Django improvements, Adrian hacks on side projects for the public good, such as chicagocrime.org, which won the 2005 Batten Award for Innovations in Journalism. He lives in Chicago and maintains a weblog at [www.Holovaty.com](http://www.Holovaty.com).
