**Kurzbeschreibung**This collection of the finest, most important, and most moving speeches of President Barack Obama is a wonderful addition to any library of presidential writings, and useful to anyone interested in reading for themselves the well-crafted words of our 44th President. The Essential Obama includes every major speech given by Obama dating back to his 2002 address against the war in Iraq. It features the entire text of such historic and memorable speeches as his 2004 keynote at the Democratic National Convention; his speech on race during the 2008 presidential campaign; his inaugural address; and presidential speeches including the address in Cairo to the Islamic world. Read for yourself why many have called Obama the greatest communicator since Ronald Reagan, and the finest Presidential writer since Abraham Lincoln.
