**Von Nael G. Bunni : The FIDIC Forms of Contract** before purchasing it in order to gage whether or not it would be worth my time, and all praised The FIDIC Forms of Contract:

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Most information is for FIDIC IVVon Hans HunterI purchased this book particularly for getting information on the new FIDIC standard forms of contract which were published 1999. The book basically treats FIDIC IV which was the contract form before 1999. Only very few parts contemplate the FIDIC red, yellow and silver books. Unfortunately there is very little additional information and the FIDIC Contracts Guide appears to contain more information. For engineers having enough money to spend on that kind of literature and having interest in the FIDIC background it is

still a valuable investment.

**Kurzbeschreibung** In September 1999, FIDIC introduced its new Suite of Contracts, which included a new Red, Yellow, Silver and Green forms of contract. The new Red Book was intended to replace the 1992 fourth edition of the Red Book, with the ambition that its use would cease with time. This ambition has not materialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been very little published on the new concepts adopted in them and how they interact with the previous forms. This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997, when the second edition of this book was published, and relates them to key contracting issues. It is written by a chartered engineer, conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms specified in them. Important features of this book include: background and concepts of the various forms of contract; a detailed comparison of the wording of the 1999 three main forms, which although similar in nature; it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose; analysis of the rights and obligations of the parties involved in the contract and the allocation of risks concerned; a range of decision tree charts, analysing the main features of the 1992 Red Book, including risks, indemnities and insurances, claims and counterclaims, variations, procedure for claims, programme and delay, suspension, payments and certificates, dispute resolution mechanisms, and dispute boards; a much enlarged discussion of the meaning of claim and dispute and the types of claim with a discussion of the Notice provision in the 1999 forms of contract for the submittal of claims by a contractor and by an employer; the FIDIC scheme of indemnities and insurance requirements; and the methods of dispute resolution provided by the various forms of contract; and five new chapters in this third edition, the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards.

**Pressestimmen** 'The great merit of this book is that [it] assimilates the complexities of the form and focuses upon the practicalities.' Arbitration 'One of the great virtues of the book is that it is almost a work on construction law and practice in the international sphere....It is quite common for books to be described as indispensable but that is an apt description of what looks to be a classic text. It is also remarkably good value for money.' Judge Humphrey Lloyd QC, International Construction Law , 2005.
